

Order Of The Iron Crown

540 EUR

Period : 19th century

Condition : Etat d'usage

Description

Half-size of the Order of the Iron Crown. Silver (tested), and I believe gold for the small medallion with the emperor's head. No hallmarks found. Weight 5.97 grams. Mid-19th century manufacture, ribbon from that period. Light blue enamel in fair condition, motto barely legible (too small for my eyes). Dimensions: 17 mm at its widest point, 28 mm high without the ring, ring 12.5 mm in diameter. Feel free to ask any questions.
