artistic dimension to this piece. These ornaments, typical of the 18th century, reflect the refinement and attention to detail that characterize this period. It is in sound condition. Despite its age, this chest of drawers has stood the test of time, retaining excellent structural integrity. Its overall condition is good, which is rare for a piece of furniture of this age, and testifies to the meticulous care it has received. I should mention that the legs have undergone old, very well-executed repairs. These restorations, carried out with great care, are almost invisible and in no way detract from the beauty or stability of the piece. On the contrary, they demonstrate the respect and love shown to this piece throughout the centuries. There is a small chip on the corner of one drawer. This minor flaw does not affect the use or the overall aesthetic of the chest. It simply serves as a reminder of its authenticity and its journey through time, adding a touch of unique character. Its generous dimensions--width 128 cm, depth 66 cm, and height 99 cm--make it a majestic piece, ideal for enhancing a living room, entryway, or spacious bedroom. It stands out as a central element, around which the space is elegantly organized. This antique chest of drawers is much more than just a piece of furniture: it's a work of art in its own right, an invitation to travel back in time while adding a touch of timeless elegance to your home. A piece to cherish and pass down. You can follow me on Instagram by following this link:
