

## Glazed Earthenware Ushabti Egypt Archeology Antique

820 EUR

Period : Before 16th century

Condition : Bon état

Material : Earthenware

Height : 14,3

### Description

Egyptian Faience Ushabti (Shabti) with Turquoise Blue Glaze. Ancient Egypt, Late Period. Height: 14.3 cm. Mummiform ushabti figure with arms crossed over the chest, holding the characteristic agricultural implements (hoes). The face, with stylized features, is framed by a tripartite wig. The body is covered with hieroglyphic inscriptions arranged in horizontal registers. The glaze displays an attractive ancient patina, with wear and small losses consistent with the age of the object. Visible deposits and minor surface alterations; no apparent restoration. Mounted on a modern removable ebony (black wood) base. Good overall condition. Wear, minor chips and ancient losses, as well as superficial concretions. All my objects for sale can be viewed in Issy-les-Moulineaux. For any further
