

Honeycomb-shaped Glass With A Red Filament Stem - France Or Bohemia, 18th Century

350 EUR

Period : 18th century

Condition : Très bon état

Material : Glass

Diameter : 6,7 cm

Height : 13,6 cm

Description

Blown glass with a molded conical bowl of honeycomb-like cells. The baluster stem with a twisted knot and an inset red filament rests on a flat, round foot. France or Bohemia, 18th century. Very good condition, with minor air bubbles and impurities in the glass. The inclusion of the filament adds a touch of color and makes this charming glass desirable. Height: 13.6 cm - Bowl diameter: 6 cm - Foot diameter: 6.7 cm
