

Wrought Iron Bullet Mold - 18th Century

600 EUR

Period : 18th century

Condition : Bon état

Material : Wrought iron

Length : 38,5 cm

Description

Authentic wrought iron bullet mold, dating from the 18th century, used for casting lead bullets for black powder firearms. Entirely hand-forged, it features long arms, scrolled ends characteristic of the period, and a screw clamping system with a spherical knob. In excellent condition with a consistent antique patina. Ideal for collectors, antique firearms enthusiasts, or for historical decoration.
