## Large Table Thrift Store - Art Nouveau Style

### Description

An elegant glass tabletop vase, composed of a central tulip and two side tulips with flowing, undulating lines, characteristic of the Art Nouveau style. The composition combines layered milky opaline glass and translucent green glass, creating beautiful effects of depth and light. The floral shapes, the movement of the lines, and the harmony of the colors clearly evoke the naturalistic and decorative aesthetic of the turn of the 20th century. The molded glass base with a wavy rim, in matching tones, can also serve as a decorative bowl. The stems are held by a gilt metal element, highlighting the elegance of the whole and ensuring its stability. Condition: Very good overall condition. There is only a tiny, old chip on the base, discreet and without affecting the aesthetics or the sturdiness of the piece

360 EUR

Period : 20th century

Condition : Très bon état

Material : Glass

Height : 51
