

Undated Archaic Sculpture - Animal Bust

360 EUR

Period : Before 16th century

Condition : Bon état

Material : Stone

Width : 9cm

Height : 11cm hors socle

Description

Undated Archaic Sculpture - Animal Bust. This undated archaic sculpture, carved from a mineral material with an eroded surface, presents a roughly anthropomorphic form. The volume is irregular, marked by natural cavities and surface alterations that contribute to the object's antique appearance. The lower part is set into a simple, added wooden base. The base, later than the sculpture, likely dates from the 19th century. An inscription indicating "Magdalenian" is found beneath the base. This inscription reflects an old interpretation and does not constitute an established date for the object itself. The piece is characterized by a stable state of preservation, with wear, losses, and concretions. Height: 11 cm without the base (14 cm with). Width: 9 cm. Base dimensions: 12 x 12 cm.
