

Set Of Crystal And Sterling Silver Toilet Bottles Circa 1900 Saint Louis & Coignet

2 800 EUR

Description

A set of five toiletry bottles... In cut and engraved blown crystal... From the SAINT LOUIS glassworks... Mounted in solid silver... By the Parisian silversmith COIGNET... Certified by the French Minerva hallmark... 950/1000 fineness... From the 1900s... All the bottles have been checked except for the atomizer... Which I can confirm is silver-plated metal! Currently, the atomizer is stuck... With a small solder joint that has broken... Otherwise, the crystals are free of chips... Just a few dents on some of the stoppers... Which are actually caps... Because all of them, except for the powder box and the atomizer, have emery-ground stoppers... A fairly classic design with cut and engraved sections... The three bottles are of different sizes... Total weight... 1.894 kg
