Description

Pair of sleek, solid brass candlesticks, designed by Bernt Karlsson for Gusum - Metallslöjden (metalworking company), Sweden. Designed by the talented Bernt Karlsson, these candlesticks demonstrate timeless craftsmanship and artistic ingenuity, executed with precision and attention to detail. The candlesticks possess a strong presence; their design is substantial and modern, with clean lines in a cubic architectural style. The smooth, angular lines, combined with a tapered central foot and collar, characterize the expressive appearance of this pair of candlesticks. The removable tray is gently curved and smooth. The foot measures 2.5 x 2.5 cm. The patina is beautiful and can be polished to a brilliant shine upon request.
