

Important Collection Of Automata

5 800 EUR

Period : 20th century

Condition : Etat d'usage

Material : Linen

Description

Rare and important collection of automata from the 1950s to the 1980s, all powered by standard 220-volt electricity... 27 automata in total, 22 in excellent working order and 5 needing servicing or even restoration... The materials vary, so please don't hesitate to ask for further information. Due to the number of automata, I cannot provide detailed photos; I have mainly taken general overviews. Detailed photos are available upon request. This collection was part of the museum of a well-known circus, which I could show to serious buyers... I cannot provide dimensions as they vary too much.
