

Silver Metal Hot Water Bottle Lamp

650 EUR

Period : 19th century

Condition : Très bon état

Material : Silver metal

Height : 55

Description

Silver-plated metal bouillotte lamp. The hexagonal, scalloped shape features chased detailing, molding, and high relief. (15 cm diameter) The geometric baluster alternates between a toupie (a type of scroll) and molding. The scroll-shaped branches rest on a scroll and shell motif. The vases have hexagonal facets and a cup with floral lacework. The toupie at the top features the same shape. The linen lampshade has been replaced with cream linen. (18 cm high) Screw-in bulbs. Rewiring checked. Beautiful light! Delivery possible, not included in the price.
