

Silver-plated Vodka Cooler / Ice Bucket With Integrated Glass Holder

400 EUR

Period : 20th century

Condition : Très bon état

Material : Silver metal

Diameter : 20,5 cm

Height : 24,5 cm

Description

A superb cooler, specially designed for the spectacular and optimal serving of chilled spirits (vodka, aquavit, or liqueurs). This piece stands out with its ingenious presentation system, which keeps both the bottle and its tasting glasses perfectly chilled. This design allows the lower basin to be filled with ice. The cold then radiates upward to simultaneously frost the central bottle and the six small tasting glasses, ensuring the ideal tasting temperature while creating a magnificent centerpiece.
