### Description

Oval Extendable Walnut Dining Table

Period: Early 19th Century

Origin: Emilia, Northern Italy

Wood: Walnut and Beech

Height: 79 cm

Width: 120 cm

Length: 165 cm closed - 246 cm with extensions

### Description

Oval dining table from the first half of the 19th century, originating from the Emilia region, with a solid apron and a central opening system.

The top is veneered in four sections of flamed walnut, arranged in a four-part herringbone pattern. The veneers are matched symmetrically, creating a regular central design that highlights the natural figuring of the wood. The table opens at the center: the two halves slide on wooden

runners and allow the insertion of two solid-wood extension leaves, which extend the oval shape.

The extensions have a simple and functional surface, without veneering.

The apron is covered with end-grain walnut veneer, a solution that emphasizes the vertical texture of the wood and visually distinguishes the apron from the top. The lower edge features a continuous moulding with light carved decoration.

The legs are made of solid beech and display a faceted, truncated-conical construction. At the upper part of each leg is a carved rhomboid motif, typical of Emilian tables of the 19th century. The table offers generous seating capacity both in its closed and extended configuration.

#### Planned Restoration

- Structural restoration: reintegration of small missing parts, closure of minor cracks, consolidation of weakened areas, inspection and repair of the hardware
- Complete woodworm treatment
- Cleaning and sanitization of the interior
- External finish with natural beeswax
- Internal finish with shellac, a natural alcohol-based varnish
