Hozon Kyokai (the Society for the Preservation of Japanese Art Swords), is one of the oldest Japanese sword evaluation organizations in modern Japan. Dimensions: 4.4 x 51 x 3 cm. Blade length: 34.7 cm. Curvature (sori): 0.4 cm. Weight: 235 g. Notes: Kanefusa is said to have been a student of Kanetsune and the father of Wakasa no Kami Ujifusa, but several swordsmiths bear the same name, making identification difficult. This piece is a highly elegant "sunnobi tanto" (sword sword) that testifies to the skill of the artisans of the period.
