Description

An elegant painted plaster sculpture, typical of the organic sensibility of the 1970s and 80s. This work presents a play of rounded, almost biomorphic volumes with soft, sensual forms.

The whole evokes a dialogue between spheres and vertical curves, in a spirit akin to modernist design and late 20th-century decorative abstract sculpture. The surface is covered with a nuanced blue-green patina, with a slightly metallic effect, which subtly captures the light and enhances the depth of the forms. The work bears a monogram "NR", visible on the piece. Highly decorative, it will find its perfect place in a contemporary, modernist, or 1970s vintage interior. Height: 38 cm. Period: 1970s-1980s. Material: Painted plaster. Signature: Monogram NR. Condition: Very good overall condition, slight signs of wear
