

## Copper Plant Pot - 1970s

200 EUR

Period : 20th century

Condition : Bon état

Material : Copper

Length : 24,5 cm

Width : 24,5 cm

Height : 25 cm

### Description

An elegant, cubic copper planter dating from the 1970s, with a clean, architectural design. Perfectly geometric in shape, it is crafted from copper with a beautiful natural patina, displaying warm hues ranging from deep brown to golden and slightly oxidized highlights. This patina, acquired over time, lends it all its vintage charm and authenticity. Each side is adorned with a circular pull ring mounted on a square base, a decorative detail with an almost neoclassical inspiration that contrasts with the modern lines. The interior retains its luminous golden hue. Its cubic form and graphic presence make it an ideal piece for a 1970s interior, a mid-century modern, contemporary, or eclectic decor. It can hold a houseplant, serve as a decorative planter, or even as an extra storage container. Date : 1970s.
