Dutch-style Hammered Solid Silver Teapot, 1970s Design

1 800 EUR

Period : 20th century

Condition : Très bon état

Material : Sterling silver

Description

Hammered Solid Silver Dutch Water Pitcher, 1970s Design. This very elegant solid silver Dutch water pitcher is remarkable for its typical 1970s design, with clean lines and a completely hand-hammered surface. The piece has a slender and balanced silhouette, enhanced by a carved dark wood handle, offering a warm contrast to the satin sheen of the silver. The craftsmanship is of high quality, characteristic of 20th-century Dutch silversmithing, with meticulous handwork and a decidedly modernist aesthetic. The Schönhoven hallmark attests to controlled Dutch manufacture and 934/1000 silver, a high standard specific to the Netherlands. Likely intended for water or table beverages, this pitcher combines functionality with sculptural elegance. A choice piece for lovers of Scandinavian-Dutch design
