Description

Gold and Silver Metal Chessboard - Circa 1980/1990. A superb contemporary chessboard dating from the 1980s/90s, with a clean, architectural design typical of the late 20th century. The board, framed by a wide, polished gold metal mount, features a high-contrast black and white checkerboard. The pieces, with their modernist and minimalist design, are made of silver-plated chrome for one side and gold metal for the other. Their cubic and structured form evokes a postmodern, almost sculptural aesthetic, reminiscent of the design creations of this period. The set exudes a strong decorative presence: a true work of art as much as a chess set, it will find its perfect place in a contemporary interior, an office, or a collection dedicated to 1980s/1990s design. Very good overall condition. Complete
