

## Openwork Sculpture In Malachite - Landscape With Pine Trees And Bridge, Decorative Work - 19th C

650 EUR

Period : 19th century

Condition : Très bon état

Material : Other

### Description

An elegant decorative sculpture crafted from natural malachite, finely carved with openwork detail. The composition depicts a stylized Asian-inspired landscape with pine trees, rocks, foliage, and a small bridge, evoking traditional gardens and the aesthetics of literati landscapes. The stone displays a beautiful concentric green veining characteristic of malachite, offering lovely variations in hue ranging from deep to light green. The carving reveals a rich and detailed decoration, with numerous plant elements rendered in relief and transparency. This decorative piece belongs to the tradition of ornamental hardstone sculptures, prized for cabinets of curiosities, refined interiors, or collections of art objects inspired by the Far East. A beautiful decorative object, both mineral and
