Description

Piedmontese walnut sideboard
Antique Piedmontese walnut cabinet, an expression of late-17th-century woodworking, featuring a robust construction, balanced proportions, and handcrafted details that reflect the evolution of early Subalpine furniture.
Technical details: Period: second half of the 1600s
Origin: Piedmont
Wood: Walnut
Height: 112 cm (44.1 in)
Width: 134 cm (52.8 in)
Depth: 57 cm (22.4 in)
Description: Piedmontese sideboard from the second half of the 17th century, a solid and compact piece made of walnut with a warm, slightly amber finish typical of Subalpine production of the period. The structure, with double doors, features essential lines reflecting a fully Baroque taste focused on functionality and restrained decoration. The front is dominated by

two large carved panels, each adorned with a radiating star motif, incised with deep grooves that create a pronounced sculptural effect. The door frame is articulated with simple geometric bands, while the sides retain smooth panels bordered by mouldings. The base, solid and slightly projecting, stands on console-type feet with small period-shaped outlines. Both the back and the interior feature hand-forged ironwork -- hinges and locks with visible hammered nails. The top board, made from a single wide plank, shows the natural patina acquired over time. Standard interventions carried out on all our furniture:- Structural restoration: replacement of small missing parts, closure of any cracks on the backboard, consolidation of weakened areas, inspection and repair of ironwork.- Thorough anti-woodworm treatment.- Interior cleaning and sanitisation.- Exterior finishing with natural beeswax.- Interior finishing with shellac, a natural alcohol-based varnish. Customisations: On request, it is possible to define:- the desired level of restoration;- the customisation of interiors (addition of hanging bars, shelves, dividers, etc.).
