### Description

Amulet pendant, heart-shaped rock crystal on a silver setting: corded base, crenellated setting. The crystal is faceted, each face having five facets vertically to enhance the stone's brilliance! These pendant jewels were often worn by women in maternity wards and later by infants. Rock crystal, with its purity, provides protection and a boost of energy. Originating in Germany, this talisman, due to its shape, is a piece of jewelry that would be perfectly at home in a cabinet of curiosities, but can also be worn! Similar examples can be found in German museums.
