

Large Resin Bowl-sculpture On A Pedestal From The 1970s.

480 EUR

Period : 20th century

Condition : Parfait état

Diameter : 34 cm.

Height : 29 cm.

Description

In the wake of Radical Design, an artistic and architectural movement that emerged in Florence in the mid-1960s as a reaction against Good Design and the "consumer society," Radical Design sought to change the perception of modernism through utopian projects. The Radical Design movement was short-lived (disappearing at the end of the 1970s) but left a lasting impression on architecture and design (see: Stefano Boeri and Gaetano Pesce). Through its reflections, it laid the foundations of Postmodernism. Excellent condition. Diameter: 34 cm. Height: 29 cm.
