460 EUR

Period : 18th century

Condition : Bon état

Material : Ceramic

Diameter : 25

Height : 17

### Description

Openwork Faience Fruit Basket, Malicorne - 18th Century  
Height: 17 cm  
Diameter: 25 cm  
An openwork faience fruit basket from Malicorne, dating to the 18th century. The relief decoration, richly composed of fruits, nuts, foliage, and flowers, unfolds freely across the entire surface. The openwork structure of the basket reveals the fully modeled elements arranged within, and demonstrates a true technical tour de force, down to the most intricate recesses of the sculpture. This round, openwork model is less common than the oval and closed versions more typically encountered. The white glaze enhances the modeling and highlights the richness of the decoration. Good overall condition, with minor losses and small chips consistent with age. Gallery view: A characteristic example of Malicorne

production, where the finesse of relief and composition takes precedence. The openwork, combined with the interior decoration, offers a renewed reading of the piece from different angles. A decorative object of real presence, equally suited as a centerpiece, a display item, or within both modern and traditional interiors.
