

Decorative Longwy Enamel Plate With Birds And Floral Motif

130 EUR

Period : 20th century

Condition : Parfait état

Diameter : 22,5

Description

Decorative Longwy enamel plate with birds and floral motif
Charming decorative enamel plate by Faïencerie de Longwy, featuring a vibrant and richly detailed polychrome design. The rim is adorned with a striking turquoise ground filled with scrolling foliage and stylized flowers in vivid tones of pink, yellow, and deep blue: characteristic of Longwy's renowned enamel work. At the center, a crackled reserve depicts two birds among flowering branches, rendered with delicacy and balance. The contrast between the dense ornamental border and the light, poetic central scene gives the piece a strong decorative presence. 20th century work, bearing the factory mark to the reverse. Condition: excellent condition. Gallery's view: A reliable and highly decorative example of Longwy enamels,
