

Crucifix With Christ In Ivory Within A Golden Frame - 18th Century

3 200 EUR

Period : 18th century

Condition : Très bon état

Material : Ivory

Width : 80

Height : 120

Description

A beautiful crucifix composed of a refined Christ carved from natural ivory, mounted on a gilded wooden cross and set within an impressive carved and gilded frame. The Christ, of remarkable craftsmanship, features fine and realistic modeling: particular attention is paid to the anatomy, with accurate rendering of the muscles and veins, as well as the intense and thoughtful facial expression. The posture, with a bowed head and relaxed body, harks back to late 18th-century models. The cross and frame, in carved and gilded wood, are embellished with Baroque decorative motifs and culminate at the top with angelic heads. The red velvet background strongly enhances the sculptural presence of Christ. Accompanied by CITES documentation compliant with current legislation (No.
