

## Iridescent Art-nouveau Bowl By Loetz,

590 EUR

Signature : Verrerie de LOETZ

Period : 20th century

Condition : Très bon état

Material : Glass

Diameter : 23 cm

### Description

Lovely art-nouveau goblet in iridescent glass and applications by LOETZ, "Nautilus" design. A fine example of iridescent glassware in the shape of a triangle, with rims and corners heat-worked into wavelets. 3 iridescent glass applications in the shape of nautilus enhance the overall effect. A model well referenced at Loetz, so we can attest to its origin with certitude (iridescent glassware is often attributed to this noble signature, but this is not often the case). See last photo, a screenshot from Loetz.com. Beautiful size: 23 cm diameter, perfect condition, produced in 1903. Genuine Loetz piece, fine glasswork.
