

Wig Holder , Blown Glass Ball , Potichomanie , ( Circumference 72 Cm) Mid XIX Th Century

280 EUR

Period : 19th century

Condition : Très bon état

Material : Glass

Diameter : 70 cm

Description

A large glass ball used as a wig-holder or as a hat , made in the mid-19th century using the potichomanie technique , which consists in cutting out pictures of illustrations executed on paper , and sticking them on the inside of a ball , then covering the surface with paint , so as to give the appearance of painted porcelain .The white reflection is due to the light.On the very colorful ball, we can see five characters and many butterflies.
