

Four-bladed Propeller, Wood, Early 20th Century

2 300 EUR

Period : 20th century

Condition : Très bon état

Description

Rare four-bladed wooden propeller. You never see them, even though two-bladed ones abound on sales sites...This one has 9 holes for attachment to the motor, which is quite unique. The markings present do not allow original identification. It's obviously not one of those horrible modern replicas, but a specimen probably dating from the years 1917/25. It measures 1m70 in height as shown in the photos, and 2m40 in diameter. The price is very very reasonable...!Don't hesitate to ask any questions.
