

## Neolithic Quartz Beads

100 EUR

Period : Before 16th century

Condition : Très bon état

Material : Crystal de roche

Diameter : entre 10 et 18 mm

### Description

Neolithic Niger quartz/quartzite cut beads  
Between -6500 and -2500 years ago. Diameters:  
between 10 and 18 mm. Old private collection,  
collected on site by a French geologist (between  
1978 and 1990). Piercing was done by manually  
rotating a piece of pointed flint (a piercer),  
requiring a long time and dexterity to avoid  
breaking one of the two lithic pieces. period  
retouched edges for more "brilliance".
