### Description

Sculptural ormolu candlestick by Georges Mathias for Fondica, characteristic of organic, expressive work from the second half of the 20th century. The piece features a loose vertical composition, evoking a stylized plant or coral form. The shaft unfolds in successive excrescences with sinuous, dynamic lines, creating a particularly vibrant interplay of shadows and reliefs. The tripod base, widely expanded, ensures stability while extending this biomorphic aesthetic. The gilding has a depth and brilliance that magnifies the asperities of the bronze. This is a piece of character, at once primitive and extremely refined.
