Width : 82  
Height : 41

### Description

Carved coffee table / coffee table top -  
Craftsmanship - 20th century / early 19th century  
topOriginal square-shaped coffee table, resting on  
four straight legs connected by metal struts,  
providing stability and character to the set.The  
top is the outstanding feature of this piece: it is  
composed of woodwork carved and assembled in  
relief, forming a geometric decoration centered  
around a stylized star. The background features a  
repeating pattern in small pieces of wood,  
creating a particularly decorative effect of texture  
and depth.The whole testifies to handcrafted  
work, with a play of volumes and materials that  
gives this table a strong visual presence, at the  
crossroads of traditional and decorative  
influences.The structure, in dark-stained iron,  
contrasts elegantly with the lighter, patinated
