Description

Timeless Elegance: The Allure of 1930s

Alabaster If you are looking for an art piece to transform your home's atmosphere, this stunning pair of alabaster lamps is a standout opportunity among my current offerings. Crafted in Italy in 1930, these pieces perfectly embody the refined taste and master craftsmanship of the era. The central body, carved from exquisite alabaster, rests on a solid and elegant wooden base, reaching a height of 37 cm. Their most distinctive feature is the fan-shaped fabric lampshade (H. 25 cm, W. 40 cm), decorated with evocative Orientalist charcoal drawings. These motifs not only recall the exotic charm typical of the early 20th century but also create a soft, atmospheric light--perfect for enhancing a sophisticated living room or a professional study.
