Description

Charming little sellette in the Louis XV/Louis XVI transitional style in inlaid wood. Resting on three arched legs covered with bronze sabots and linked by a small crotch shelf, our sellette has a circular top finely inlaid with plant and insect decoration. The belt is also inlaid all around and is embellished with a drawer. Very light and therefore easy to move. As a whole in good condition. We would like to point out a few old rings (probably caused by watering a plant) which are discreet and do not affect the aesthetics of the marquetry (see last photo).
