Description

Wrought-iron gate from the Art Nouveau period, fashioned around 1900, whose bottom plates need changing. The 40 mm² and 40 x 20 mm solid-iron frames are in good condition, as are the U-profile iron bars. Three upper spikes have been straightened. The height of the side uprights is 201 cm for a height to the hinge axis of 161 cm. For the lower sheets, we recommend welding 6 tabs (30 x 4 mm flat iron) to the frames and screwing on a sheet, leaving a gap between the frames and the sheets to avoid any future rust problems. A 23-m fence gate of the same workmanship can be added. Fence gate sold as is. You can visit our site: www.claudeaugustin.com
