

Fossil Stone Coffee Table, Collection Fossile, Switzerland, Circa 1980

750 EUR

Period : 20th century

Condition : Etat d'usage

Material : Stone

Width : 120

Height : 42

Depth : 65

Description

Fossil stone coffee table edited by Collection Fossile in Switzerland circa 1980. The rectangular top with canted corners features a richly veined surface, integrating visible marine fossils, including shells and cephalopod fragments dating from around 340 to 480 million years ago. The polished stone highlights the organic and mineral structure of these natural inclusions, forming a unique design. The ensemble rests on four chromed metal feet positioned at each corner.
