

Biedermeier Bookcase/display Cabinet

1 800 EUR

Period : 19th century

Condition : Très bon état

Material : Walnut

Width : 110

Height : 175

Depth : 41

Description

Elegant Biedermeier bookcase/display cabinet in fine walnut burl, featuring the clean and balanced lines typical of early 19th-century Central European design.

The wide glazed front enhances the display of books and decorative objects, while access is provided through practical side-opening glass doors integrated into the cabinet's sides--an elegant and functional solution that preserves the purity of the front design.

The interior is fitted with wooden shelves, ideal for housing antique volumes, collections, porcelain, or works of art while protecting them from dust. The solid lower base and square feet ensure stability and presence, while the warm tone of the walnut burl beautifully highlights the natural grain, adding depth and refined character.
