

## Mid-19th-century Crystal Chandelier Featuring A Finely Crafted Gilt-metal Frame And A Rich Arra

950 EUR

Period : 19th century

Condition : Très bon état

Material : Crystal

Diameter : 60

Height : 100

### Description

Elegant mid-19th-century crystal chandelier featuring a finely crafted gilt-metal frame and a rich arrangement of cut-crystal drops and garlands. The multi-tiered central structure is adorned with prisms, teardrops, and spear-shaped pendants, enhancing light reflection and giving the piece a distinguished, regal presence.

The chandelier includes six arms, each fitted with glass bobeches and later-period candle sleeves.

The upper crystal cascade and original decorative elements reflect the high craftsmanship typical of Italian and French production from the mid-1800s.

The wiring is currently modern; an electrical check is recommended before installation.
