Description

Émile Gallé (1846-1904) - Multilayer glass lamp base with plant decoration. Elegant multi-layered glass lamp base signed Émile Gallé, featuring a finely acid-etched vegetal decoration characteristic of the work of the École de Nancy. The piece rests on a light background, with white and slightly opalescent shades, enhanced by violet-brown and amber layers forming a stylized foliage decoration. The ensemble offers a refined contrast between the transparency of the background and the depth of the relief decoration. The slender shape, resting on a flared base, gives the object a beautiful presence and great elegance. The constricted neck originally allowed the adaptation of an electrical system, now disappeared or to be retrofitted as required. Signed Gallé in reserve on the
