Height : tête de bague: 6,26 cm environ

Description

Jonc-sized ring in 750/°° yellow gold (18 KT, hibou hallmark). This beautiful ring is studded with diamonds set in the mass, each at the center of a star formed by a deep chasing with a particularly designed relief. These qualitative chiselings produce a slightly matte effect around each diamond, which enhances their particularly vivid brilliance....This arrangement of diamonds on the ring, and the stars surrounding them, give this jewel its "constellation" appellation. These old-cut diamonds, from a much older jewel, are particularly white, vivid and beautifully dimensioned....they perfectly fulfill their role as twinkling stars...in artificial light, especially, while offering a softer sparkle in daylight....An extremely easy-to-adapt format ring for everyday wear, adorned with particularly high-quality
