Height : 101 cm

Description

Walnut Biedermeier chest of drawers with 4 drawers, 19th century
Elegant Biedermeier chest of drawers dating from the first half of the 19th century, illustrating with sobriety and refinement the pure lines characteristic of this period. Made with a beautiful walnut veneer on a solid wood frame, this piece perfectly showcases the Biedermeier aesthetic, based on balanced proportions, simplicity of design and the natural nobility of wood. The front is adorned with a superb mirrored flamed walnut veneer, forming a particularly elegant symmetrical pattern across all four drawers. The deliberately uncluttered design leaves plenty of room for the rich warm tones of walnut and the liveliness of its grain. Antique-style handles further enhance the authentic character of this chest of drawers. At
