Description

Spherical pitcher on flared foot, high, widely flared neckflared neck with typical trefoil spout, fillet in slight relief at the base of the neck, handlehandleThe bucchero nero surface here is particularly smoothand shinyEtruria, late 7th to early 6th century BC.Very good condition, slight chip at base.Bucchero nero is a typical Etruscan ceramic,recognized by its glossy black surface, obtained not by the application of a glazebut by a reductive firing process. This type of ceramic,often reserved for ritual or aristocratic use, sometimes imitates metal formsand reflects a high level of technical mastery. Produced as early as the7th century B.C., it reached its peak in the 6th century, before declininggradually decline.The Musée d'Angers has a similar model dating from the 3rdquarter of the 7th century or
