Description

Art Deco brooch in platinum and 18K yellow gold, set with old-cut diamonds and an old cultured pearl, Belgian work circa 1920DescriptionBrooch from the Art Deco period, circa 1920, featuring a highly structured geometric composition characteristic of the jewelry vocabulary of the interwar period. The design is built around straight lines, rectangular projections and perfect symmetry, giving the whole an architectural reading that is highly representative of the Art Deco aesthetic.The face is made of platinum and entirely set with old-cut diamonds. Two main diamonds, placed at the ends, structure the brooch and give it a beautiful visual presence. The center is adorned with an old cultured pearl, whose satin sheen contrasts elegantly with the brilliance of the diamonds.The
