### Description

Rare night-light/perfume burner by Jean Born. He founded the company in 1908 and created trinkets in multiple forms (lamp, perfume burner, bottle...) in the Art Deco style. The firm set up its decoration workshop in Boulogne Billancourt to decorate the white porcelain pieces itself. A Robj MB stamp was affixed to this production which ceased in 1929. Our nightlight bears these stamps and its production is therefore from before 1929. Attention: accident visible on the top of the nightlight barrel. The electrical installation is recent and works perfectly.
