Description

Antique Cranial Surgery Instrument - Louis XIV Period
Fine antique cranial surgery instrument, of good size. This elevator / trephine extractor, made of forged steel with faceted and turned sections, is a powerful, generously sized tool, offering a double grip and excellent handling. It was used to assist in the operation of the trephine.

Comparable examples can be found in specialized documentation. Dimensions: 17.5 × 1.7 cm
Condition: excellent, with no breaks or restorations; only minor surface wear. A light polishing would further enhance its appearance. Origin: old French work, 17th-18th century. Buy it now - payment by credit card or PayPal. Eclectic, (not experts). but over 50 years in the trade
