### Description

Partially fire-gilt bronze Late Mannerist statuette of the mourning Virgin  
Probably Italy, circa 1600

Height: 18.5 cm

Height including turned wood base: 23.5 cm

Provenance: private collection, The Netherlands

\*

A beautiful and very sensitive late Mannerist bronze statuette of the mourning Virgin Mary, probably originally looking up at a Crucifixion and flanked by a balancing figure of St John. Still retaining part of the original fire-gilding.

Good condition for the age, mounted on a later turned-wood
