Description

French Art Deco bronze candlesticks of Egyptian inspiration. Classical figures with severe features, standing on a small pedestal. These figures, with their classical, antique look, are distinguished by the linear elements of their necklaces and their hairstyles with almost graphic contours. The object rests on three feet - an open bird's beak forms the stepped base. The figures are identical, although the patina varies slightly. Heavy, extremely decorative candlesticks; we've added a glass plate and candles.
