

Gill 45

1 750 EUR

Signature : Roberto pamio

Period : 20th century

Condition : Très bon état

Diameter : 45

Height : 45

Depth : 45

Description

The Gill collection, designed in 1962 by Roberto Pamiop for Leucos, was a huge success. This model is the most advanced version of the table lamp, as it comes with a dimmer switch (a classic E27 tungsten filament bulb is recommended for good dimming amplitude). The dividing line between the two qualities of glass is projected randomly onto the surrounding surfaces and varies according to the intensity chosen. Price per unit 2 available
