150 EUR

Period : 20th century

Condition : Bon état

Material : Earthenware

Description

Malicorne earthenware centrepiece - naturalistic fruit décor - 20th century
Charming Malicorne polychrome earthenware centerpiece, with particularly expressive relief decoration depicting an abundant composition of fruit and foliage: bunches of grapes, apples, plums and flowers, treated with a realism and generosity typical of this production. The composition, in a woven basket, features highly decorative work in the round, where volumes and colors create a lively, warm ensemble, ideal as a centerpiece or decorative element. The polychromy, in shades of green, purple and yellow, is well preserved and offers a beautiful visual presence. Dimensions: Width: 23 cm Height: 17 cm
To note:- some chips and enamel chips on some fruits- normal wear and tear- good general
