Description

A rare children's version of the desk designed by Alain Richard, published by T.F.M. and developed as part of the A.R.C. Mobilier National programs. The white laminate panel structure framed in black accommodates a top set into rounded aluminum corners, with a side pedestal suspended from two yellow laminate drawers. This graphic contrast provides a clear, dynamic reading, with a liveliness suited to a child's interior. Manufacturer : T.F.M France, circa 1974.
