Depth : 54

### Description

This walnut dresser perfectly embodies the sober, refined elegance of the Louis-Philippe style. Its harmonious front is structured by a molded top drawer, whose soft lines emphasize the quality of the woodwork. At the bottom, two walnut doors reveal magnificent mitered framed panels, whose natural grain adds warmth and character. A pair of decorative mouldings punctuate the center of the front, reinforcing the cabinet's elegant presence. The interior features three drawers, perfect for organizing table linen, accessories or documents. The base of the cabinet is highlighted by a doucine plinth, typical of the style, which softens the silhouette while giving it stability. At the front, claw feet add a final touch of strength and balance. This walnut dresser is both a decorative and functional piece, equally at home
